ANEXA 1.2.1 - Program de circulație tramvaie

ANEXA 1.2.2 - Program de circulație troleibuze

ANEXA 1.2.3 - Program de circulație autobuze

**PROGRAMUL DE TRANSPORT
AL SOCIETĂȚII DE TRANSPORT BUCUREȘTI SA**

Anexa 1.1 Programul de Transport

Tip program / Mod de transport	Km. Planificați			Perioada de aplicare
	Zi de lucru	Zi de sâmbătă	Zi de duminică și sărbători legale	
PROGRAM NORMAL				
Tramvaie	54574.683 km/zi	39019.950 km/zi	39019.950 km/zi	In toate zilele in afară de vacanță vară elevi
din care:				
zi	54396.796 km/zi	38842.063 km/zi	38842.063 km/zi	
noapte	177.887 km/zi	177.887 km/zi	177.887 km/zi	
Troleibuze	28252.683 km/zi	20737.457 km/zi	20877.380 km/zi	
Autobuze	204334.404 km/zi	136173.263 km/zi	136598.158 km/zi	
din care:				
Trasee urbane	157290.402 km/zi	102468.961 km/zi	102893.856 km/zi	
Trasee regionale	40953.725 km/zi	27614.025 km/zi	27614.025 km/zi	
Trasee de noapte	6090.277 km/zi	6090.277 km/zi	6090.277 km/zi	
PROGRAM DE VACANȚĂ				
Tramvaie	54574.683 km/zi	39019.950 km/zi	39019.950 km/zi	In toate zilele de vacanță vară* elevi
din care:				
zi	54396.796 km/zi	38842.063 km/zi	38842.063 km/zi	
noapte	177.887 km/zi	177.887 km/zi	177.887 km/zi	
Troleibuze	28252.683 km/zi	20737.457 km/zi	20877.380 km/zi	
Autobuze	204235.759 km/zi	136173.263 km/zi	136598.158 km/zi	
din care:				
Trasee urbane	157191.757 km/zi	102468.961 km/zi	102893.856 km/zi	
Trasee regionale	40953.725 km/zi	27614.025 km/zi	27614.025 km/zi	
Trasee de noapte	6090.277 km/zi	6090.277 km/zi	6090.277 km/zi	
TOTAL KM ANUALI PLANIFICAȚI				
Tramvaie	18,193,183.932 km anual			
din care:				
zi	18,128,255.177 km anual			
noapte	64,928.755 km anual			
Troleibuze	9,486,714.435 km anual			
Autobuze	67,036,102.374 km anual			
din care:				
Trasee urbane*	51,345,748.344 km anual			
Trasee regionale	13,467,402.925 km anual			
Trasee de noapte	2,222,951.105 km anual			
Total Km transport	94,716,000.741 km anual			

*15 iunie-14 septembrie considerată perioadă de vacanță

Marja de abatere de maxim 5% pe km totali pe fiecare categorie de Program - pentru cauze speciale, adaptare la cerere justificata, alocarea programelor pe autobaze si depouri.

ANEXA 3

Anexa 3.1

Cerințe standard pentru mijloace de transport

Principii Generale

1. Principalul obiectiv al prezentei Anexe este să stabilească cerințele comune specifice aferente mijloacelor de transport care vor fi utilizate pentru prestarea Serviciilor de Transport.
2. Toate Mijloacele de Transport care vor fi utilizate la prestarea Serviciilor de Transport trebuie să fie conforme cerințelor obligatorii stabilite pentru respectivele Mijloace de Transport în ceea ce privește "tipul" și "categoria". Conformitatea Mijloacelor de Transport cu cerințele standard va fi verificată pe baza documentelor emise de autoritățile competente.
3. Pentru a asigura protecția mediului, emisiile poluante de noxe ale Mijloacelor de Transport utilizate la prestarea Serviciilor de Transport trebuie să fie în limitele stabilite de către lege pentru tipurile respective de motoare și carburanți.
4. Cerințele tehnice pentru Mijloacele de Transport prezentate în această anexă vor fi actualizate automat în situația apariției unor noi reglementări. În această situație, Părțile vor actualiza prezenta Anexă incluzând cerințele tehnice noi stabilite prin lege.

Cerințe generale standard pentru autobuze/troleibuze/tramvaie

1. Starea interioară și exterioară a mijloacelor de transport prin care se prestează servicii în temeiul prezentului Contract trebuie să fie permanent în conformitate cu cerințele stabilite de legislație.
2. Toate dispozitivele și fiecare dintre acestea care sunt instalate în mijloacele de transport trebuie să fie păstrate și reparate astfel încât toate mijloacele de transport să poată fi utilizate în permanență.
3. Fiecare mijloc de transport trebuie să fie dotat, pentru fiecare ușă, după caz, în funcție de performanța sistemelor ITS, cu validator electronic a titlurilor de călătorie.
4. Operatorul va avea dreptul ca, după cum hotărăște, să amenajeze zone publicitare atât în interiorul cât și în exteriorul mijloacelor de transport. Publicitatea nu va afecta vizibilitatea sau lizibilitatea numerelor traseelor, semnele cu destinația, logo-urile Entității Contractante și al Operatorului nu va acoperi nicio fereastră dacă acesta nu permite vizibilitatea spre exterior. Colantarea mijloacelor de transport se va face cu respectarea prevederilor legale în domeniu.
5. Înainte de plecarea în fiecare cursă programată, mijloacele de transport vor fi supuse unui control pentru a se asigura că sunt curate în vederea utilizării de către călători, s-a respectat Programul de igienizare a parcului de mijloacele de transport și nu au suprafețe alunecoase, deteriorate sau periculoase, inclusiv scaunele și armăturile mijloacelor de transport.

6. Mijloacele de transport în exploatare vor îndeplini cerințele tehnice obligatorii cu privire la siguranța și protecția mediului stipulate în legislația în vigoare, precum și cerințele tehnice cu privire la compatibilitatea cu sistemul de taxare integrat.

Cerințe specifice pentru autobuze/troleibuze/tramvaie

1. Autobuzele utilizate de către Operator la prestarea serviciului vor fi de tip autobuz urban, potrivit legislației românești în vigoare.
2. Autobuzele aflate în dotare vor fi echipate cu motoare minim EURO 3 la momentul semnării contractului. Autobuzele ce vor fi achiziționate după momentul semnării contractului vor fi conforme cel puțin cu standardul de emisii pentru prima înmatriculare în vigoare la data achiziției și vor respecta "Reglementările privind certificarea încadrării mijloacelor de transport înmatriculate sau înregistrate în normele tehnice privind siguranța circulației rutiere, protecția mediului și în categoria de folosință conform destinației, prin inspecția tehnică periodică - RNTR 1" aprobat prin Ordin nr. 2133 din 08/12/2005, cu modificările și completările ulterioare. Sunt acceptate exclusiv autobuze care utilizează combustibili alternativi, autobuze hibride și electrice.
3. Fiecare mijloc de transport va fi monitorizat prin sistem GPS.
4. Toate corpurile de iluminat din vehicul trebuie să fie funcționale la ieșirea în traseu.

ANEXA 3.2 - LISTĂ MIJLOACE DE TRANSPORT UTILIZATE DE CĂTRE SOCIETATEA DE TRANSPORT BUCUREȘTI STB S.A. ÎN PRESTAREA SERVICIULUI PUBLIC DE TRANSPORT LOCAL DE CĂLĂTORI

PREMIZE DE CALCUL :

1. S-au utilizat în esutularea cncetueilor, a veniturilor și a diferențelor de tarif urmatorii factori de creștere:

IPC anul 3 este egal cu 104.9 aferent anului 2023;

IPC anul 4 este egal cu 103.0 aferent anului 2024;

IPC anul 5 este egal cu 102.7 aferent anului 2025

pentru anii 6-final Contract se mentine acelasi IPC de 102.0

IPC anuali sunt conform Comisia Nationala de Prognoza - Prognoza principalilor indicatori

macroeconomici - varianta de iarna 2021

2. Venituri vanzari- 2% crestere anuală

3.Structura persoanelor beneficiare de diferente de tarif nu se schimba

Anexa 5

Costuri eligibile incluse în calculul decontării PSO și cerințele privind contabilitatea separată

Fundamentarea costului unitar/km (lei/km) pentru serviciile de transport public local de călători prin curse regulate, pe fiecare categorie de mijloc de transport se face pe baza consumurilor normate de combustibili, de lubrifianți, a cheltuielilor de întreținere-reparații și cu piese de schimb, a cheltuielilor cu munca vie, precum și pe baza celorlalte elemente de cheltuieli necesare pentru serviciul de transport public local de persoane.

Metodologia de alocare a costurilor indirecte și administrative între activitățile de transport public și alte activități de transport, precum și de alocare a costurilor indirecte și administrative eligibile între modurile de transport, se va aproba de către Entitatea Contractantă, în termen de 60 de zile de la încheierea contractului. Auditul anual tehnico-economic va face recomandări Entității Contractante privind adoptarea unei metode de gestiune și alocare a costurilor mai potrivită (după analizarea împreună cu operatorul privind posibilitatea aplicării ei), în vederea creșterii eficienței operatorului .

Operatorul poate desfășura și alte activități în următoarele condiții:

- i. Activitățile respectă legislația respectivului domeniu de activitate;
- ii. Activitățile respective își acoperă în întregime costurile din veniturile colectate;
- iii. Activitățile nu afectează în niciun fel prestarea serviciului de transport public local;
- iv. Activitățile respectă concurența.

Toate înregistrările contabile trebuie realizate în așa fel încât să se poată demonstra verificarea calculului cheltuielilor eligibile și neeligibile pe fiecare mod de transport și a compensației pentru obligația de serviciu public și condiția de la punctul iii pentru alte activități, prin deschiderea de conturi analitice în cadrul contului sintetic care reflectă tipul de cheltuială.

Operatorul va ține contabilitatea analitică și separată pentru activitățile și serviciile care fac obiectul desfășurării contractului de servicii de transport public local, precum și pentru alte activități și servicii care generează costuri sau venituri indirecte și nu sunt asociate serviciului de transport, în funcție de legile contabile și fiscale în vigoare.

Principiile privind evidența contabilă analitică și separată pentru costurile eligibile înregistrate sunt:

- a) Principiile privind conceptul costului total alocat, în care costul total aferent desfășurării unui anumit tip de serviciu sau realizării unui singur produs este atribuit aceluși serviciu sau produs.

Astfel, costurile totale alocate ale obligației de serviciu public a operatorului trebuie să includă următoarele:

- i. Costurile directe cu personalul, de amortizare, de resurse materiale și servicii efectuate de terți care au legătură cu Serviciul de transport public local, inclusiv serviciul datoriei societății, folosit exclusiv pentru îndeplinirea Obligației de serviciu public;
- ii. O cotă proporțională din costurile indirecte eligibile, incluzând costurile tehnice și administrative cu personalul, de capital și resurse materiale.

Ca exemple de chei de alocare, defalcarea pe moduri și pe activități TP/non TP a unor cheltuieli pentru care înregistrarea primară diferențiată nu este posibilă se poate face după următorul model :

- Consumul comun de energie electrică pentru tracțiune tramvaie/troleibuze se defalcă direct proporțional cu energia electrică efectiv consumată (produsul dintre puterea instalată medie, numărul mediu de vehicule în circulație și timpul mediu de circulație).
 - Cheltuielile de exploatare (întreținere, amortismente, utilități) generate de elementele comune de infrastructură (substații electrice, depouri, etc) se repartizează pe moduri direct proporțional cu indicatorii de exploatare.
 - Cheltuielile administrative și cele pentru servicii-suport (structura de conducere, contabilitate, personal, IT, etc.) eligibile, să fie direct proportionale cu indicatorii de exploatare.
- b) Cheltuielile realizate de Operator asociate activităților de colectare a veniturilor provenite din titluri de călătorie, din diferențele de tarif și din activitățile de control a călătorilor, pentru realizarea Obligațiilor de serviciu public sunt cheltuieli eligibile și se evidențiază distinct în situațiile financiar contabile.
 - c) Cheltuielile și veniturile asociate contractelor comerciale încheiate cu Operatorii desemnați privind activitățile de colectare a veniturilor provenite din vânzarea titlurilor de călătorie, din diferențele de tarif și din activitățile de control a călătorilor, nu sunt eligibile și se evidențiază distinct în situațiile financiar contabile, pentru fiecare operator desemnat în parte.
 - d) Toate costurile legate de desfășurarea serviciilor din afara PSO vor fi alocate doar acelor servicii, precum și o cotă proporțională din costurile fixe comune ale operatorului, astfel încât nicio subvenție încrucișată sau supracompensare să nu fie produsă.
 - e) Toate costurile și veniturile provenind din și pentru activitățile comerciale de exploatare trebuie bazate pe rezultatele financiare oficiale ale operatorului.

Evidența contabilă se va organiza pe analitice distincte ale conturilor pe fiecare mod de transport și pe alte activități.

Toate veniturile, costurile, tarifele și prețurile vor fi calculate în RON, fără TVA, cu excepția cazurilor unde se specifică altfel.

Operatorul va utiliza Metoda ABC (Activity Based Costing) pentru gestiunea costurilor pe activități sau altă metodă agreată de către autoritatea contractantă.

Metoda ABC vizează, pe de o parte, calculul și analiza costurilor, iar pe de cealaltă parte, constituie un instrument de măsură a performanțelor operatorului.

Cheltuielile aferente activităților de pregătire a documentațiilor pentru investițiile din Programul de Investiții al UAT-ului, precum și cheltuielile aferente activităților de asistență tehnică, desfășurate de Operator în baza unui Contract încheiat între UAT și Operator se consideră neeligibile pentru calculul cheltuielilor de exploatare CE aferente Obligațiilor de serviciu public.

Raportare

Înainte de data de 30 iunie a fiecărui an, Operatorul va furniza Entității Contractante un raport anual pentru anul calendaristic anterior, inclusiv situațiile financiare certificate de un Auditor certificat independent.

Raportul anual trebuie să conțină următoarele rapoarte specifice:

- i. Situațiile financiare anuale și anexele la acestea;
- ii. Raportul de gestiune al administratorilor;
- iii. Raportul auditorului ce a efectuat auditul statutar;
- iv. Raportul privind inventarierea patrimoniului;
- v. Raportul privind realizarea investițiilor prevăzute în anexele/ Documentele asociate la contract;
- vi. Situația analitică a veniturilor;
- vii. Situația analitică a amortizării;
- viii. Numărul angajaților și cheltuiala de personal
- ix. Raportul privind realizarea Programului anual de întreținere și reparare a infrastructurii de transport și a mijloacelor de transport utilizate
- x. Raportul privind reclamațiile, evidențiate pe categorii de probleme.

Investiții făcute de Operator în numele UAT

În cazul efectuării de către Operator a operațiunilor aferente investițiilor în care beneficiază de asistență financiară nerambursabilă din partea UE și din surse IFI, anexa va fi adaptată în baza prevederilor Acordului de Finanțare / Împrumut / etc. și în baza Ordonanței Guvernului nr. 198/2005 privind crearea, furnizarea și utilizarea Fondului de Întreținere, înlocuirea și dezvoltarea proiectelor de dezvoltare a infrastructurii serviciilor publice care beneficiază de finanțare din partea UE.

În cazul realizării investițiilor prin surse de la bugetul local, UAT va fi responsabilă de finanțarea cheltuielilor de implementare a investițiilor prin alocarea bugetară de capital.

Operatorul va ține o evidență distinctă a costurilor de investiții realizate și se va asigura transferarea către UAT a valorii investițiilor puse în funcțiune și recepționate pentru înregistrarea în evidența patrimoniului public și preluării acestora de către Operator ca bunuri concesionate.

Anexa 6

Anexa 6.1

Metodologia de calcul și modificare a costului unitar/kilometru

Costul unitar/kilometrul parcurs este prețul pentru serviciul de transport furnizat, calculat pe baza costurilor eligibile ale serviciului de transport al Operatorului, prevăzute în Anexa 5. Atunci când se stabilește costul unitar/ km, trebuie să fie urmate toate principiile cu privire la alocarea costurilor din Anexa 5.

Calculul se va face separat, pentru tramvaie, troleibuze, autobuze.

- (1)** Costul unitar/ kilometru parcurs trebuie să facă obiectul unui audit tehnico – economic extern efectuat anual prin grija Entității Contractante. Toate costurile și veniturile astfel înregistrate pe conturi analitice pe moduri de transport și alte activități sunt introduse în situațiile financiare anuale ale Operatorului. Costul/km eligibil pentru fiecare mod de transport (tramvai, troleibuz, autobuz urban și regional) pentru anul următor anului auditat se calculează de către Entitatea Contractantă prin indexarea costului pe km, rezultat din auditul tehnico-economic pe anul anterior și aprobat de organele statutare ale Entității Contractante, cu IPC-ul total comunicat de INSSE, aplicat pentru perioada ianuarie a anului următor anului auditat – data aprobării costului pe km auditat, de către organele statutare ale Entității Contractante. Aplicarea noului cost/km se va face prin încheierea unui act adițional la Contract.
- (2)** Costurile unitare/km (lei/km) pentru serviciile de transport public local, pe fiecare categorie de mijloc de transport se pot modifica pe baza cererilor primite de la operatorii de transport.

Modificarea costului unitar/km, stabilit pentru serviciul public de transport local de călători se poate realiza la solicitarea fundamentată a operatorului, certificată de către un auditor extern, contractat de Operator, care analizează următoarele cheltuieli eligibile:

- a) cheltuielile cu combustibilii, lubrifianții, gaze naturale și energie electrică;
- b) cheltuielile cu amortizarea se determină respectându-se reglementările legale în vigoare;
- c) cheltuielile cu întreținerea - reparațiile - piesele de schimb, anvelopele, acumulatori și alte cheltuieli de exploatare;
- d) cheltuielile cu munca vie se fundamentează în funcție de legislația în vigoare, corelată cu principiul eficienței economice;

- e) cheltuielile cu impozitele, autorizațiile, alte taxe și asigurări se determină potrivit prevederilor legale în vigoare;
- f) cheltuielile financiare detaliate corespunzător;
- g) cheltuielile realizate de Operator în legătură cu pregătirea proiectelor de investiții finanțate

Operatorul trebuie să prezinte Entității Contractante toate documentele relevante, datele și calculele, indicând motivele pentru modificarea solicitată a costului unitar/kilometru. Entitatea Contractantă va examina propunerea Operatorului în 15 zile de la data primirii acesteia și nu poate refuza nejustificat modificarea Contractului.

În vederea stabilirii unui echilibru contractual, Entitatea Contractantă va lua în considerare solicitările de modificare a costului/km propuse de operator, doar dacă este îndeplinită cel puțin una din următoarele condiții:

- Procentul creșterii prețului mediu pe 3 luni consecutive al combustibililor (pentru alimentarea mijloacelor de transport) sau al energiei electrice (pentru alimentarea mijloacelor de transport) este mai mare decât indicele total al prețurilor de consum pe o perioadă de 3 luni consecutive;

- modificarea salariului, în baza creșterii salariului lunar minim garantat în plată stabilit prin legislația națională, cu condiția aprobării în Adunarea Generală a Acționarilor Operatorului a măsurii respective.

Cheltuielile anterior enumerate au o pondere semnificativă în structura costului/km, motiv pentru care creșterea acestora poate genera influențe financiare negative pentru operator.

Entitatea Contractantă va înainta organelor statutare, spre analiză și aprobare solicitarea de modificare a costului/km fundamentată de operator.

Compensația calculată în baza costului/km modificat și aprobat va face parte din obiectul analizei auditului tehnico economic anual efectuat prin grija Entității Contractante, audit care va stabili valoarea eligibilă a compensației anuale.

Cheltuiala cu certificarea de către un auditor extern a solicitării de modificare a costului/km este cheltuială eligibilă.

- (3)** Entitatea Contractantă, la solicitarea fundamentată a Operatorului, poate proceda la scăderea costului/kilometru în cursul anului, ca urmare a scăderii semnificative a oricărui element de cost.

Anexa 6.2

Formula de indexare a costului unitar/ kilometru

Costurile unitare/km (lei/km) pentru serviciile de transport public local, pe fiecare categorie de mijloc de transport, se pot ajusta periodic, cu indicele total al prețurilor de consum, dar nu mai devreme de o dată la trei luni, pe baza cererilor primite de la operatorii de transport. Indicele total al prețurilor de consum se aplică costului/km existent la data precedentei ajustări.

Ajustarea costului unitar/km se va face prin Act Adițional la Contract.

FORMULA DE INDEXARE A COSTULUI/KM

$c_{\text{unitar-tip mijloc de transport km, n+i}} = (c_{\text{unitar-tip mijloc de transport km, n}} - D_{\text{tip mijloc de transport}}) \times I_{\text{PC}}(n) + D_{\text{tip mijloc de transport}}$
unde:

$c_{\text{unitar-tip mijloc de transport km, n+i}}$ este costul unitar/ km, pe categorie de mijloc de transport, ajustat [lei/km];

$c_{\text{unitar-tip mijloc de transport km, n}}$ este costul unitar/ km, pe categorie de mijloc de transport, în vigoare la data ajustării [lei/km];

$D_{\text{mijloc de transport}}$ este deprecierea (amortizarea) mijloacelor fixe, cuprinsă în calculul costului unitar/km în vigoare la data ajustării [lei/km];

$I_{\text{PC n}}$ este inflația calculată pe baza nivelului ultimului Indice Total al Prețurilor de Consum publicat la momentul solicitării ajustării, raportat la nivelul Indicelui Total al Prețurilor de Consum existent la data precedentei ajustări.

Anexa 7 Indicatori de performanță ai serviciului și modalitatea de calcul a penalităților

Anexa 7.1 - Indicatori de performanță ai serviciului pentru anul 1

Anul.....

Nr. Crt.	Indicatori	Descriere mod de calcul, pentru un trimestru	Mod	Parametru			Pondere criteriu	Valori ale parametrilor raportului operatorului	Valori de calcul malus	Incalcare majora	Calcul penalitate pe trim.: V = valoare de referinta pentru penalități (Costuri totale an/4*25%*1.07%)
				U.M.	Nivel acceptat, fara penalizari	Nivel maxim permis					
0	1	2	3	4	5	6	7	8	9 = 8 - 5 9 = 8-5 pt indicatorii de minim	10	11=(9/6)*7*V 11=(9/5)*7*V pt indicatorii de minim
1.	Curse/semicurse neefectuate, precum și curse/semicurse neregulate din vina operatorului	[Σ (Curse sau semicurse neefectuate; curse sau semicurse neregulate) / total curse sau semicurse incluse in Programul de Transport]*100 <i>*Pentru fiecare Operator se va aplica formula fie pe numărul de curse, fie pe numărul de semicurse, în funcție de raportarea Operatorului</i> <i>**Prin total curse sau semicurse incluse în Programul de Transport, aferent acestui indicator, se înțelege totalitatea curselor sau semicurselor planificate în trimestrul analizat</i>	tramvai	%	3	5	15,00%				
			autobuz	%	2	4	15,00%				
			troleibuz	%	2	4	9,00%				
2.	Trasee neefectuate pentru o perioadă de mai mult de 24 de ore din vina operatorului	[Σ(lungimea traseelor neefectuate x zile în care nu s-au efectuat trasee)]*100 / (lungimea totală a traseelor cuprinse în programul de transport *nr. de zile trimestru analizat)	tramvai	%	0	1	1,00%				
			autobuz	%	0	1	1,00%				
			troleibuz	%	0	1	1,00%				
3.	Numărul de pasageri afectați de situațiile de la punctele 1 și 2 din vina operatorului	Numărul de pasageri afectați de situațiile de la punctele 1 și 2	tramvai	Nr./zi	10000	20000	1,00%				
			autobuz	Nr./zi	8000	16000	1,00%				
			troleibuz	Nr./zi	2000	4000	1,00%				

4.	Numărul total de mijloace de transport utilizate zilnic, comparativ cu numărul necesar pentru realizarea programului de circulație		Prin formulă se calculează nerespectarea planului de servicii pentru o zi: $\frac{\sum[(\text{parc planificat zi pe intervale orare} - \text{parc maxim realizat zi pe intervale orare})/\text{parc planificat zi pe intervale orare}]/\text{nr. intervale orare pe zi} * 100}{\text{nr. zile trim. analizat}}$ Ca măsură tranzitorie până la implementarea indicatorilor în soft-ul de monitorizare, se va folosi următoarea formulă de calcul: $[\frac{\sum(\text{parc programat zi} - \text{parc maxim realizat zi})/\text{parc programat zi} * 1(\text{zile}) * 100}{\text{nr. zile trim. Analizat}}]$	tramvai	%	2	4	2,00%				
				autobuz	%	1	2	2,00%				
				troleibuz	%	1	2	1,00%				
5.	Reclamații de la călători privind calitatea transportului	Reclamații fundamentate	(\sum Nr. reclamații fundamentate înregistrate)/3	tramvai – toate subiectele inclusiv relația cu călătorii, excepție salubritatea	Nr./luna	20	30	1,00%				
			autobuz– toate subiectele inclusiv relația cu călătorii, excepție salubritatea	Nr./luna	50	80	1,00%					
			troleibuz– toate subiectele inclusiv relația cu călătorii, excepție salubritatea	Nr./luna	5	9	1,00%					
			Infrastructură – toate modurile	Nr./luna	18	25	1,00%

Anexa 7.2 Modalitatea de calcul a indicatorilor de performanță

1. Indicatorii de performanță sunt calculați trimestrial în baza coloanei 2-*Descriere, Mod de calcul pentru un trimestru* care se aplică pe fiecare **componentă** a indicatorului prevăzută în *coloana 3- Mod*.
2. Respectarea indicatorului este evaluată pentru fiecare componentă a acestuia din coloana 3, fiecărei componente a indicatorului de performanță fiindu-i alocat un coeficient de importanță (*Pondere criteriu*), un prag sub care penalizarea nu se aplică (*Nivel acceptat, fără penalizări*) și un prag peste care se consideră încălcare majoră a performanței (*Nivel maxim permis*).
3. Excepție de la punctul 1- pentru *Indicatorii de minim* - valoarea considerată acceptată, fără penalizări este cea din coloana 6, iar valoarea aferentă nivelului maxim permis se găsește în coloana 5. Toate referirile ce urmează, în calculul pentru acești indicatori, vor ține seama de această prevedere.
4. Nerespectarea oricărei componente a indicatorilor de performanță (depășirea *nivelului acceptat fără penalizări*) de către Operator duce la aplicarea de penalități. Penalitățile vor fi reținute din garanția constituită conform Capitolului 10 din prezentul Contract.
5. ***Valoarea de referință pentru calcul penalităților = (Costuri totale trimestru*1.07%)*25%***
6. ***Penalitatea pentru o componentă a unui indicator de performanță se calculează astfel:***
 - i. Pentru valori ale indicatorilor de performanță realizați de Operator ***sub pragul sub care penalizarea nu se aplică***, la **coloanal 9- valori de calcul malus** se completează cu ***valoarea raportată de Operator***.

PENALITATEA ESTE 0.

- ii. Pentru valori ale indicatorilor de performanță realizați de Operator ***între pragul sub care penalizarea nu se aplică și valoarea maximă acceptată fără a fi considerată încălcare majoră a performanței***, la **coloanal 9- valori de calcul malus** se completează cu ***valoarea raportată de Operator din care se scade valoarea corespunzătoare nivelului acceptat, fără penalizări***.

PENALITATEA ESTE CALCULATĂ astfel:

(Valoarea de calcul malus/Nivel maxim permis)*Pondere criteriu*Valoarea de referință pentru calcul penalităților

- iii. Pentru valori ale indicatorilor de performanță realizați de Operator **peste valoarea maximă acceptată fără a fi considerată încălcare majoră a performanței**, se completează cu **valoarea 1 la coloana 10 -Încălcare majoră**, iar valoarea din **coloana 9 -valoarea de calcul malus este egală cu valoarea raportată de Operator din care se scade valoarea corespunzătoare nivelului acceptat, fără penalizări.**

PENALITATEA ESTE CALCULATĂ astfel:

(Valoarea de calcul malus/Nivel maxim permis)*Pondere criteriu*Valoarea de referință pentru calcul penalităților,

7. ***Pentru nerespectarea oricărei componente a unui indicator de performanță de către Operator***, adică depășirea *valorii din coloana 5-Nivel acceptat, fără penalizări*, Entitatea Contractantă notifică Operatorul, iar acesta are obligația întocmirii și comunicării către Entitatea Contractantă a unui **Plan de Măsuri pentru îndeplinirea indicatorilor**, în termen de 30 de zile de la data notificării.

În cazul în care Entitatea Contractantă *agreează* planul de măsuri propus pentru îndeplinirea indicatorilor, acesta urmează a fi aprobat de către Entitatea Contractantă în termen de 2 zile lucrătoare de la primirea acestuia.

În cazul în care Entitatea Contractantă *nu agreează* planul de măsuri propus pentru îndeplinirea indicatorilor, acesta va fi actualizat de către Operator în termen de 10 zile, conform obiecțiilor Entității Contractante, fiind ulterior aprobat de aceasta în termen de 2 zile lucrătoare de la primire.

Aplicarea Planului de Măsuri astfel aprobat este obligatoriu pentru Operator, neîndeplinirea măsurilor prevăzute în plan este sancționată conform prevederilor Contractului.

8. În cazul în care Operatorul totalizează un număr de **100 încălcări majore ale componentelor indicatorilor de performanță pentru anul 1 de contract, 80 încălcări majore pentru anul 2 de contract și 50 încălcări majore începând cu anul 3 de contract**, potrivit Anexei 7, Entitatea Contractantă are dreptul să rezilieze Contractul.

9. Pentru a verifica îndeplinirea **primilor 4 indicatori** și pentru a monitoriza executarea Contractului, se vor utiliza rapoartele sinteză obținute din sisteme de monitorizare, din echipamentele disponibile operatorului, completate cu rapoartele acestuia date pe proprie răspundere, conform Anexei 9 - Metodologia de monitorizare și evaluare a Programului de Transport Public al Operatorului;
10. Definirea termenilor indicatorului 2: Lungimea totală a traseelor (se adună lungimea fiecărui traseu o dată) în programul de transport reprezintă lungimea totală programată pe ziua în care nu s-au efectuat curse/semicurse; lungimea traseului reprezintă lungimea unei curse).
11. Calculul Valorii indicatorului 3 pe fiecare mod de transport, se face prin înmulțirea numărului curselor/semicurselor neefectuate și neregulate aferente indicatorilor 1 și 2, pe respectivul mod de transport, cu jumătate din capacitatea maximă a unui vehicul. Astfel, pentru tramvaie se consideră capacitatea maximă 300 călători, pentru autobuz 100 călători, pentru troleibuz 100 călători. La indicatorul 3, ținând cont de unitatea de măsură „nr./zi”, se va lua în considerare acea valoare aferentă zilelor în care nu au fost efectuate cursele din vina operatorului de transport.
12. La indicatorul 4: se calculează numărul total de mijloace de transport public utilizate zilnic, numai în raport de vârful de trafic V1; parc programat reprezintă numărul de vehicule necesar în circulație pentru realizarea integrală a programelor de circulație; parc utilizat reprezintă numărul de vehicule scoase efectiv zilnic în circulație). Indicatorul 4 se calculează pe baza raportărilor asumate de operator la vârful de trafic V1 și transmise Entității Contractante.
13. Operatorul va înregistra toate reclamațiile primite direct de către acesta sau indirect Entității Contractante sau UAT-urilor, prin orice mediu și canal (scris, mediu electronic, telefonic), într-un registru special pentru reclamații, *Registrul de reclamații*. Acest registru va fi structurat în funcție de competența de răspuns a Operatorului -petiții la care Operator formulează răspuns în mod direct și petiții pe care Operatorul le redirecționează către Entitatea Contractantă. Operatorul va transmite Entității Contractante un Raport lunar cu privire la soluționarea reclamațiilor înregistrate în registrul de reclamații din luna anterioară, conform modelului prevăzut în Anexa 11 la Contract.
14. Pentru calculul **Indicatorului 5**, o **reclamație justificată** reprezintă orice reclamație înregistrată conform punctului 11, care întrunește cumulativ următoarele criterii:
 - are drept subiect activități din domeniul de competență al Operatorului;
 - conține informații concrete, detaliate, care permit identificarea și verificarea lor de către Operator, în vederea luării măsurilor impuse;
 - se dovedește ca fiind reală, în urma verificărilor efectuate de către entitățile organizatorice responsabile ale Operatorului.

Reclamațiile primite de la diferiți petenți, ce se refera la același eveniment, indiferent prin ce canal se primesc se conexează și se interpretează o singură dată ca reclamație fundamentată.

Reclamație rezolvată reprezintă acea ***reclamație/petiție justificată*** pentru care Operatorul ***a analizat și a remediat și/sau a luat măsuri pentru nerepetarea situației prezentate, după caz, precum și a informat petentul/petenții privind măsurile luate. Această prevedere se corelează cu definiția de la punctul 12, privind conexarea reclamațiilor fundamentate.***

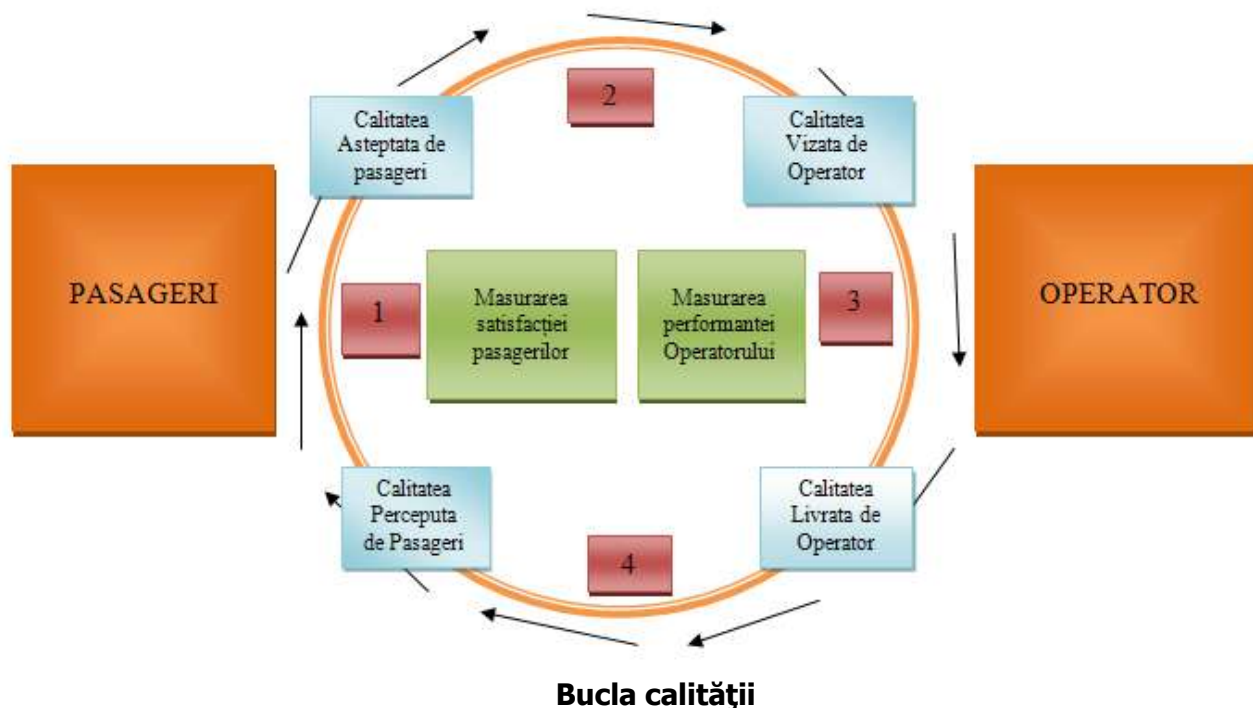

Reclamație cu răspuns în termen legal reprezintă orice reclamație înregistrată conform pct. 11, pentru care Operatorul a răspuns ***petentului în termen de 30 de zile de la data înregistrării reclamației.***

15. ***În calculul Indicatorii 6 și 7 se*** utilizează datele privind parcul circulant raportat de Operator conform Anexei 9 la Contract și *Raport situație Parc Linii Noapte/Zi Model* din Anexa 11.7 la Contract.
16. Pentru **Indicatorii 8 și 9**, se preiau valorile din înregistrările contabile ale Operatorului.
17. **Indicatorul 10** se calculează pe baza valorilor privind evenimentele de circulație înregistrate în documentele și a nr.de Km realizați, raportat de Operator.
18. **Indicatorul 11-Indicele de satisfacție a călătorilor**, începând cu anul 2023, Entitatea Contractantă va stabili nivelul minim acceptat fără penalizări și nivelul maxim permis, pe baza studiului ce se va realiza pentru prestația aferentă anului 2022. Până în anul 2023, indicatorul va fi considerat realizat și nu se va aplica nicio penalitate.

Anexa 8 Indicele de satisfacție a pasagerilor (ISP)

1. Generalități

Prezenta anexa are drept scop definirea cerințelor fundamentale privind metodologia referitoare la evaluarea anuală a indicelui de satisfacție a Pasagerilor (ISP), având în vedere prevederile standardelor naționale și europene referitoare la măsurarea calității sistemelor de transport public și a calității managementului contractelor.

2. Indicele de satisfacție a pasagerilor

a) Entitatea Contractantă organizează și finanțează evaluări anuale ale indicelui de satisfacție a Pasagerilor (ISP).

b) Această sarcină trebuie să revină unor terțe persoane independente (care nu sunt părți la Contract) care efectuează studii privind gradul de satisfacție al pasagerilor pe bază de chestionare și sondaje.

c) Metodologia pentru efectuarea studiului și calcularea indicilor privind gradul de satisfacție al pasagerilor se discută și se definește cu operatorul, după cum urmează:

i. Metodologia trebuie să fie conformă cu cerințele incluse în Standardul EN 13816.

ii. Indicatorii de calitate stabiliți în Anexa 7 se pot utiliza ca bază pentru chestionar pentru a efectua studiul de evaluare a gradului de satisfacție a pasagerilor. Pot fi totodată adăugați și alți indicatori relevanți pentru evaluarea calitativă a serviciilor (curățenia vehiculului, comportamentul angajaților Operatorului, siguranța percepută, etc.). Chestionarul are ca

scop principal compararea indicatorilor de calitate oferți și a indicatorilor de calitate percepuți de pasageri.

iii. Rezultatul final al studiului include un procent de pasageri mulțumiți datorită performanței indicatorilor cheie stabiliți în Anexa 7 și un număr de pasageri nemulțumiți prin compararea cărora se poate identifica gradul de satisfacție a așteptărilor acestora.

iv. După finalizarea analizei comparative a gradului de satisfacție al pasagerilor derivat din studiul efectuat și Indicatorii de Calitate de performanță oferți, evaluați de către Entitatea Contractantă, aceasta împreună cu Operatorul trebuie să elaboreze planuri de măsuri pentru îmbunătățirea calității transportului public.

Noile planuri pentru îmbunătățirea calității transportului public pot viza schimbarea valorilor vizate ale indicatorilor cheie și revizuirea Programului Operatorului de Transport Public pentru anul următor.

Anexa 9

Metodologia de monitorizare și evaluare a programului de transport al operatorului

A. Principalele caracteristici

- 1) Prezenta metodologie definește modalitatea prin care se realizează monitorizarea flotelor de vehicule aparținând operatorului de transport public cu care TPBI are încheiat un contract de delegare a gestiunii serviciului de transport public local de călători.
- 2) Monitorizarea de către TPBI presupune urmărirea prestației Operatorului în Centrul de Monitorizare propriu și verificarea rapoartelor lunare (se vor transmite în formatul stabilit în anexa la prezenta- "RAPOARTE"), din care să reiasă întreaga prestație, pentru care se va face decontarea prestației.
- 3) Monitorizarea de către TPBI, prin sisteme de monitorizare puse la dispoziție de către operator, ca obligativitate a prestării serviciului, acestea stând la baza generării rapoartelor de la punctul 2
- 4) TPBI, prin propriul Centru de Monitorizare și Control, va avea acces permanent la toate sistemele de monitorizare ale operatorului și la orice alte date utile în procesul de monitorizare a prestației, va avea acces permanent și neîngrădit la vizualizarea tuturor foilor de parcurs și prin implementarea sistemului foi de parcurs electronice
- 5) Urmărirea aplicării metodologiei de monitorizare se află în sarcina TPBI.
- 6) TPBI va monitoriza și evalua prestația Operatorului STB SA în comparație cu Programul de Transport al acestuia.
- 7) Menținerea în bună stare de funcționare a echipamentelor și a aplicațiilor software în gestiune/administrare, care stau la baza calculului prestației, se află în sarcina operatorului.
- 8) Monitorizarea se va realiza cu ajutorul unui Sistem de Monitorizare, fiind definit ca orice sistem electronic care furnizează parametri necesari evaluării prestației (curse, semicurse, km, coordonate GPS, viteza, traseu, etc.)
- 9) Responsabilitatea funcționării continue a Sistemelor de monitorizare aflate în administrarea sa , cade în sarcina Operatorului.
- 10) Orice disfuncție a Sistemelor de Monitorizare, va fi raportată telefonic și în scris către Entitatea Contractantă în maxim 2 ore .

- 11) Orice defect al unui vehicul, care afectează programul de circulație, precum și un raport al prestației pentru defectele comunicate se vor comunica în maxim 2 ore, telefonic sau prin email, TPBI/Centrului de Monitorizare.
- 12) Operatorul va furniza rapoarte lunare pentru toate liniile gestionate și toți indicatorii agreeți prin contract.
- 13) Rapoartele referitoare la numărul de km realizați se vor constitui în anexe la factură, iar eventualele neconcordanțe vor fi clarificate până la factura următoare.
- 14) Celelalte rapoarte vor intra într-un proces de analiză, astfel încât, după perioada de clarificare, vor sta la baza eventualelor penalități sau propuneri de modificare a programului de transport.
- 15) Ca măsura suplimentară pentru controlul datelor din rapoartele primite, TPBI va efectua prin sondaje, în mod continuu, diverse observații și măsurători în teren. În cazul apariției unor discrepanțe acestea vor fi clarificate cu Operatorul în termenul agreed de comun acord.
- 16) Indicatorii de raportare a prestației conform Programului de Transport

Indicatorii cheie pentru raportarea prestației, conform Programului de Transport, sunt cursele și categoria traseului în kilometri. Cursele sunt evaluate după cum urmează:

- I. Curse regulate;
- II. Curse neregulate;
- III. Curse neefectuate.

În baza evaluării prestației prin intermediul indicatorilor prevăzuți în prezenta Anexă și a criteriilor din cadrul acestei metode, se stabilește tipul de cursă.

Îi este permis Operatorului să efectueze prestații suplimentare, care nu se regăsesc în Programul de Transport, numai pe baza dispozițiilor emise de TPBI, cu obligativitatea introducerii în sistemul de monitorizare și a completării tuturor „rapoartelor (T1-T4,T8,T9,T13-T18,T24,T31-T36)” detaliat pentru fiecare prestație suplimentară.

B. Modul de evaluare a tipurilor de curse

I. O cursă regulată este o cursă care, cumulativ îndeplinește următoarele condiții:

1). Este prestată în mod regulat atunci când se inițiază de la stația de plecare respectând orarul aprobat, conform diagramei de circulație, circulația are loc de-a lungul unui traseu prestabilit, oprindu-se în toate stațiile de-a lungul traseului.

2).

a) Circulația vehiculului se desfășoară conform rutei și programului stabilit cu o abatere de până la 5 minute în fiecare stație, cu excepția capătului de linie.

b) Plecarea în avans dintr-o stație de capăt de linie înainte de ora stabilită în orarul traseului nu este admisă.

Dacă nu se respectă programul de circulație, cursa devine neregulată din culpa Operatorului și se penalizează.

c) Plecarea de la capăt de linie, cu o întârziere de până la 3 minute.

Dacă nu se respectă programul stabilit, cursa devine neregulată și se penalizează dacă este neregulată din culpa Operatorului.

II. Curse neregulate

II.a. O cursă neregulată din culpa Operatorului este o cursă, înregistrată de Sistemul de Monitorizare sau evidențiată prin rapoarte, care:

1) Nu respectă diagramele de circulație (aprobat pe fiecare linie de Entitatea Contractantă, ca detaliere a Programului de circulație, constituie obligație de serviciu pentru Operator) cu o abatere mai mare decât marja admisă în conformitate cu clauza B, I, punctul 2 a)*, b), c);

2) Nu efectuează opriri în toate stațiile de pe traseu (atunci când Operatorul nu se regăsește în situația prevăzută la punctul B.III.a.2).

**Se va aplica după implementarea sistemului de monitorizare*

II.b. O cursă neregulată fără culpa Operatorului este o cursă, înregistrată de Sistemul de Monitorizare sau evidențiată prin rapoarte, prestată cu nerespectarea de la B I. 1) și 2)*, din cauza unuia din următoarele motive**:

a) trafic excepțional ce nu putea fi prevăzut;

b) semafoare nefuncționale și semafoare cu regim special de funcționare;

c) drumuri necurățate de zăpadă și/sau cu polei;

d) zone inundate, alte cauze naturale neprevăzute;

e) mitinguri, manifestări, precum și evenimente permise și/sau efectuate printr-un ordin al unei entități abilitate;

- f) accidente de circulație rutiere, cu îngreunarea sau împiedicarea circulației, inclusiv cele în care au fost implicate vehicule ale operatorului, fără culpa acestuia;
- g) un vehicul oprit sau parcat în mod necorespunzător pe traseul de deplasare alocat în mod normal transportului public urban, împiedicând astfel circulația rutieră;
- h) lucrări de reparații în regim de urgență;
- i) actele de vandalism într-un vehicul al Operatorului;
- j) călători pentru care s-a solicitat intervenția echipajelor de urgență;
- k) la evenimente aflate sub jurisdicția Autorităților competente (MAI, MapN, SRI, SPP, Jandarmeria, Poliția Locală, etc.) - incendiu, obiecte suspecte, investigații, etc.

**Cu excepția situației prevăzută la B I. 2) b).*

*** Operatorul are obligația de a prezenta documente justificative a motivelor invocate (note dispecer, comunicări, note telefonice).*

III. Curse neefectuate

III.a. O cursă neefectuată din culpa Operatorului este o cursă în care cel puțin una din următoarele ipoteze este valabilă:

1. Accidente de circulație rutiere, cu îngreunarea sau împiedicarea circulației, inclusiv cele în care au fost implicate vehicule ale operatorului, din culpa acestuia
2. Vehiculul se abate de la traseu, fără dispoziția TPBI sau din partea altor instituții abilitate;
3. La deteriorarea deliberată a dispozitivelor de la bord.
4. Vehicule lipsa la program.

III.b. O cursă neefectuată fără culpa Operatorului este o cursă care nu a putut fi finalizată de către Operator din diverse motive, documentate de către Operator:

1. Pentru unul din următoarele motive enumerate la clauza II, pct. b.;
2. Ca urmare a staționării vehiculului întârziat, dar fără a depăși durata cursei, pentru a asigura regularitatea.
- 3*. În timpul efectuării prestației lunare, pentru defectarea sistemului de monitorizare GPS a vehiculelor, numărul de km nemonitorizați electronic nu poate depăși lunar 2% din numărul de km realizați pe toate cele trei moduri de transport,

operatorul având obligativitatea de a înainta și a pune la dispoziție documente care să cuantifice nr. km aferenți prestației.

Kilometrii nemonitorizați electronic se vor încadra în categoriile "I Curse regulate" sau "II Curse neregulate", în funcție de documentele justificative.

4. Curse neefectuate din cauza unor intreruperi de curent independent de operatorul de transport.

**Se va aplica după implementarea sistemului de monitorizare*

C. Evaluarea curselor și sancțiunile aplicabile

Tipul călătoriei	Plata către Operator*	Nr. de km	Sanțiuni pentru Operator
I. Curse regulate	Plată kilometrilor efectuați, corespunzător curselor efectuate		n.a.
II.a Curse neregulate din culpa Operatorului.	Plata kilometrilor realizați efectiv		În funcție de nivel, penalizare calculată în conformitate cu anexa 7, indicatorul 1. În conformitate cu art. 22.3 alin.(1) pct. i² din Contract
II.b Curse neregulate fără a se datora culpei Operatorului	Plata kilometrilor realizați efectiv		n.a.
III. Curse neefectuate	Nu se plătesc.		În funcție de nivel, penalizare calculată în conformitate cu anexa 7, indicatorul 1 În conformitate cu art. 22.3 alin.(1) pct. i¹ lit. h) din Contract

D. Măsurile complementare

- a. Verificarea prin sondaj a ieșirilor și intrărilor programate din /în depouri/autobaze, pentru conformitatea parcului circulant realizat cu cel programat și raportat;
- b. Verificarea prin sondaj a modului de confirmare a curselor la capetele de linii;
- c. Verificarea prin sondaj a plecărilor ritmice în traseu (evitarea circulației "în pachete" de vehicule);
- d. Verificarea prin sondaj a aderenței prestației efective la Programul de transport în stațiile de plecare, intermediare și terminus, în conformitate cu orarele afișate și asumate de către Operator ;
- e. Verificarea prin sondaj a ieșirilor neprogramate din traseu.

E. Dispoziții finale

- a) Persoanele desemnate de către Operator care întocmesc, semnează și verifică prestațiile își vor trece numele și prenumele în clar, asumându-și corectitudinea raportării;
- b) Prestatorul va preda Autorității Contractante, la fiecare decada a lunii, în fiecare a treia zi lucrătoare de la finalizarea decadei respective, rapoartele finale aferente decadei anterioare, în format electronic);
- c) Orice factură va fi însoțită de rapoartele privind numărul de km realizați pentru perioada emisă;
- d) Rapoartele se vor preda în forma și la datele convenite, iar eventualele diferențe dintre rapoartele pe decade și rapoartele finale lunare vor fi explicitate;

Documentele primare se vor păstra și arhiva de către Operator în conformitate cu prevederile legale privind păstrarea documentelor respective pentru a fi puse la dispoziția organelor de control abilitate ori de câte ori este nevoie.

Formularele „Rapoarte de lucru” utilizate pentru aplicarea prezentei metodologii se regăsesc în Anexa 11.7 – *Modele rapoarte monitorizare*.

ANEXA 10

PROCEDURA DE CONTROL AL OPERATORULUI

A. Prevederi generale

1. Entitatea Contractantă are dreptul să verifice și să controleze periodic modul de realizare a Serviciului Public Local de Călători efectuat de către Operator în baza Contractului de Delegare a Gestiunii, inclusiv activitatea de control a călătorilor, a vehiculelor, echipamentelor și instalațiilor folosite de Operator.
2. Conform contractului de delegare încheiat între Entitatea Contractantă și operatorul de transport public se vor efectua controale în echipe mixte, cu operatorul, sau numai de către echipe ale Entitatea Contractantă.
3. Operatorul este obligat să asigure accesul în toate locațiile, la toate bazele de date, documentele, registrele și la orice informații, pe orice alt suport utilizat de Operator, solicitate de reprezentantul Entității Contractante în cadrul controlului.
4. Toate comunicările vor fi efectuate pe email iar rapoartele de control vor fi transmise cu adresă de înaintare.

B. Procedura de control mixt, Entitatea Contractantă + operator

Având în vedere caracterul continuu al acțiunilor de control, atât pentru urmărirea îndeplinirii obligațiilor contractuale, pentru confirmarea efectuării prestației, cât și îmbunătățirea continuă a serviciului de transport public, controlul se va face cu respectarea următoarelor cerințe:

1. Entitatea Contractantă notifică Operatorului intenția de control cu 24 ore anterior efectuării efective a acestuia, cu precizarea reprezentanților Entității Contractante în echipa de control, a numărului de reprezentanți necesar din partea Operatorului și a intervalului orar de activitate pentru fiecare schimb, precum și locurile de întâlnire pentru începerea controlului;
2. Operatorul, conform notificării înaintate de Entitatea Contractantă, va asigura personalul necesar efectuării controlului, pentru toate echipele mixte, informând Entitatea Contractantă cu privire la reprezentanții Operatorului în fiecare echipă;
3. Pentru fiecare echipă, operatorul va planifica cel puțin un reprezentant și va transmite planificarea acestora (email office) până la începerea acțiunilor de control;
4. Entitatea Contractantă elaborează formularele tipizate ce vor fi utilizate la acțiunile de control inițiate;
5. În urma fiecărei verificări se va întocmi un proces-verbal în două exemplare, câte unul pentru fiecare parte, semnat de către cele două părți. În procesul-verbal se vor specifica data, ora și locul inspecției, obiectul controlului, constatările în timpul controlului, documentele analizate/ridicate, după caz, precum și obiecțiile Operatorului, dacă este cazul. Entitatea Contractantă va soluționa obiecțiile Operatorului în termen de maxim 10 zile;
6. Pe baza constatărilor din teren, Entitatea Contractantă elaborează rapoartele de control;
7. Rapoartele din care reies neconformitățile serviciului de transport sau nerespectarea clauzelor contractuale, inclusiv indicatorii de performanță, în urma avizării interne, vor fi transmise și operatorului în maxim 3 zile lucrătoare de la efectuarea misiunilor de control;
8. În termen de 3 zile lucrătoare de la primire, operatorul va transmite Entității Contractante, spre avizare, un plan de remediere cu precizarea termenelor;
9. Entitatea Contractantă avizează Planul de măsuri de remediere în termen de 2 zile lucrătoare sau solicită completarea/revizuirea planului;

10. Operatorul va revizui/completa planul și va retrimite spre avizare în termen de 2 zile lucrătoare
11. Principalii parametrii, pe baza cărora se planifică acțiunile de control, din punct de vedere al tematicii, sunt, dar fără a se limita la:
- a. Parametrii care au legătură cu *Indicatorii de performanță ai serviciului*:
 - i. Curse anulate și documentarea cauzelor;
 - ii. Curse neregulate și documentarea cauzelor;
 - iii. Trasee anulate și durata anulării;
 - iv. Determinarea numărului de calatori pe fiecare linie și perioade de referință (ore de vârf, alte intervale orare);
 - v. Sondaje la ieșirile din unități pentru stabilirea numărului total de mijloace de transport utilizate, starea de curățenie a vehiculelor și programarea acestora;
 - vi. Curățenia în vehicule și în stațiile gestionate de operator;
 - vii. Modul de tratare a reclamațiilor;
 - viii. Funcționarea sistemelor care concură la furnizarea serviciului de transport:
 - 1. Sistem Automat de Taxare;
 - 2. Sistem de Monitorizare a flotei;
 - 3. Sistem de afișare la exterior a liniei și rutei;
 - 4. Sistem audio-video de informare călători în vehicul;
 - 5. Sisteme de monitorizare video;
 - 6. Sisteme de numărare pasageri;
 - 7. Sisteme de comunicații (dispecerat-vehicule);
 - 8. Alte sisteme stabilite de comun acord cu operatorul.
 - b. Parametrii care au legătură cu prestația:
 - i. Lungimea traseelor;
 - ii. Km efectuați;
 - iii. Număr de semicurse/linie;
 - iv. Timpi de staționare la capete de linie/vehicul/zi
 - v. Validări efectuate și tipuri de titluri de transport utilizate;
 - vi. Respectarea Programelor de circulație;
 - vii. Frecvențe de circulație/secțiuni de traseu și intervale de timp;
 - viii. Modul de conducere în traseu din perspectiva intervalului de succedare (circulația la pachet).
 - c. Alte prevederi contractuale:
 - i. Existența și conținutul procedurilor operaționale;
 - ii. Respectarea proceselor tehnologice;
 - iii. Respectarea programelor de funcționare a punctelor de vânzare de titluri de călătorie;
 - iv. Modul de realizare a informării călătorilor prin orice canale de informare;
 - v. Modul de realizare a lucrărilor de întreținere și mentenanță a bunurilor concesionate;
 - vi. Modul de realizare a investițiilor;
 - vii. Relaționarea personalului Operatorului cu călătorii și ceilalți participanți la trafic;
 - viii. Respectarea planurilor de remediere, a planurilor de măsuri și a instrucțiunilor transmise de Entitatea Contractantă;
 - ix. Modul de realizare a controlului călătorilor;

12. Operatorul este obligat să asigure accesul în toate locațiile, la toate bazele de date, documentele, registrele și la orice informații, pe orice alt suport utilizat de Operator, solicitate de reprezentantul Entității Contractante în cadrul controlului.

C. Procedura de control inopinat realizată de către Entitatea Contractantă

1. Entitatea Contractantă are dreptul să verifice și să controleze inopinat orice element privind activitatea operatorul.
2. Pe baza constatărilor din teren, Entitatea Contractantă elaborează rapoartele de control;
3. Rapoartele din care reies neconformitățile serviciului de transport sau nerespectarea clauzelor contractuale, inclusiv indicatorii de performanță, în urma avizării interne, vor fi transmise și operatorului în maxim 3 zile lucrătoare de la avizare; În termen de 3 zile lucrătoare de la primire, operatorul va transmite Entității Contractante un plan de remediere cu precizarea termenelor.
